Dear Sir / Madam,

I am writing to express my interest in the summer internship program at [Company Name]. As a computer science student in my second year, I am eager to gain hands-on experience in the field and am confident that my unique combination of technical skills and personal attributes make me a strong candidate for this opportunity.

I have a strong foundation in programming languages such as Java, Haskell and visual basics, and have completed coursework in data structures, algorithms, software engineering,pep/9 low-level programming, bash and many java projects Additionally, I possess exceptional problem-solving skills and a passion for creating efficient and effective solutions. I am also familiar with software development methodologies and have experience working on group projects, which have taught me the importance of effective communication and collaboration.

Aside from my technical abilities, I am an innovative and creative individual who is not afraid to think outside the box. I believe that the ability to think creatively and come up with unique solutions is crucial in today's fast-paced, ever-changing technology landscape.

I am excited about the opportunity to work with and learn from experienced professionals in the industry and am confident that I can make a valuable contribution to your team. I am eager to bring my skills, enthusiasm, and unique perspective to the internship program and look forward to the opportunity to discuss how I can contribute to the success of your organization.

Thank you for considering my application.

Sincerely yours,

Ali Muktar

Miscellaneous

2018–2019   Spent some time finding myself. This was a **courageous endeavour** that didn't have a job and was struggling mentally. It was quite important to my overall development though, so I'm adding it to my CV. Also, it explains the gap in my otherwise stellar CV.

2015-2017   **Machine Operator - at Holz Schiller(GMBH)**, I was doing apprenticeship to have become machine operator. While working in the company, I gained enormous experiences I worked alongside the manager in organising shifts and rota plans..

Awards

July-2021   Level three access to higher education - West Midlands

Soft skills and other skills

Team-leadership   I demonstrated exceptional leadership and organisational skills during my software engineering group project. I was a team leader for the group. I would moderate meetings, set goals and monitor if goals are met. Settling disputes between group members.

Others-skills:	Critical thinking, problem-solving, Adaptability, Time management
Hardware maintenance	Computer Hardware and any mobile phones
